Document Type: Articles, News & Columns

Geographic Location: United States

Reports that PayPal service from X.com of Palo Alto, CA has evolved into a major player in the **online auction** market. Says that PayPal pioneered the utilization of e-mail for person-to-person **money transfers** . Mentions that PayPal is free and growing at a rate of 15,000 to 20,000 users a month. Explains that it has made other **payment** methods seem slow, expensive, and outdated. Relates that PayPal has been a boon to **online auctioneers** , who are spared the hassle of snail mail, extra trips to the bank to deposit checks and **money orders** , and waiting for personal checks to clear before shipping items. Notes that eight months after PayPal began, it was racking up 100,000 transactions a day at an average of just under \$50 per transaction. Includes three photos and a sidebar. (MEM)

Wir werden zum Global Player

GERMANY: DEUTSCHE POST

Hannoversche Allgemeine Zeitung (XGX) 03 Jun 2000 p.11

Language: GERMAN

German Deutsche Post, which developed into an international logistics group, is aiming to become a global player. Old and new business divisions will be combined under the roof of "new" Deutsche Post World Net. Deutsche Post chairman Klaus Zumwinkel sees chances in the e-commerce business. The goods **ordered** via the **internet** have to be delivered to the client. Deutsche Post also offers industrial companies to handle the complete logistics chain for them, including warehousing activities and the **procurement** and administration of the goods. The service is used by companies such as Siemens and Tchibo and another large-scale client will follow. Deutsche Telekom AG plans to outsource the complete logistics operations to Deutsche Post in the summer 2000. In addition to its role as a retail bank, Deutsche Post subsidiary Postbank is to help finance the logistics services. Parcel deliveries to private customers are to be combined with finance offers. Customers can also pay **goods** that were **ordered online** and **delivered** by Deutsche Post subsidiary Euro Express with a **money transfer order** via Postbank.

Title: Western Union steps up to the Web

Journal: Networking Strategies vol.8, no.11 p.3-4

Publisher: Computer Economics,

Publication Date: Nov. 2000 Country of Publication: USA

CODEN: NESTFJ ISSN: 1089-9405

SICI: 1089-9405(200011)8:11L:3:WUS;1-C

Material Identity Number: H407-2000-010

Language: English Document Type: Journal Paper (JP)

Treatment: Economic aspects (E); Practical (P)

Abstract: Western Union Financial Services Inc., a subsidiary of First Data Corporation, announced in August its Western Union PayCash service, which allows consumers to pay for **Internet purchases** with cash at participating **Western Union** agent locations. The Western Union PayCash service is a unique payment option for Internet purchases because it requires no credit card, bankcard, or bank account. Consumers make their product selections online and bring their cash to a Western Union agent location, which in many cases is a nearby grocery store. Western Union will transmit the funds electronically to the merchant's bank account, meanwhile signaling the merchant that the payment has been made and prompting release of the merchandise. The service leverages the size and strength of Western Union's 90,000-location worldwide agent network, which will accept consumers' payments. Initially, the service will be available in the US, with international capability being added incrementally within 30 days. (0 Refs)

Title: Market-driven intelligent POS devices enter 2nd generation

Author(s): Iovacchini, A.

Journal: Bank Systems & Equipment vol.25, no.3 p.73-4

Publication Date: March 1988 Country of Publication: USA

CODEN: BSEQD6 ISSN: 0146-0900

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G)

Abstract: Retailers are demanding second generation POS terminals. They must be programmable to meet specialized requirements and accommodate changes. These devices meet the specifications of several different networks and operate at a 1200 band transmission rate. Functions required today include inventory tracking, clerical time and attendance records, tabulating accounting totals for each cash register, **electronic** mail and the **sale of money orders**. The **electronic** settlement process between a merchant and its card-issuing bank, known as electronic draft capture, reduces paper and speeds payment. (0 Refs)

Title: No-go for EFTPOS

Author(s): Gendall, S.

Journal: Banking World vol.3, no.9 p.23-5

Publication Date: Sept. 1985 Country of Publication: UK

CODEN: BAWOEX ISSN: 0737-6413

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G); Practical (P)

Abstract: A nationwide survey, conducted by Gallup for ICL, shows that eight out of ten Britons are ignorant of EFTPOS. Worse, more than six out of ten, who do understand it, don't like it. The survey's findings will surprise and disappoint many who advocate **payment** by **electronic** means. The thought of having **money transferred** immediately from their bank accounts found little favour with those interviewed. The findings demonstrate the 'hostility that is likely to be engendered if EFTPOS is not properly explained to customers'. It is not just the general public that has grave doubts about EFTPOS. Shopkeepers do too. ICL also sought retailers' attitudes to EFTPOS. It commissioned a survey of senior managers from 97 major retailers. Retail processing managers may feel that EFTPOS is of less importance to them than the development of a practical and effective electronic point of sale system. The retailers are looking at EFTPOS as a commercial proposition, if there is nothing in it for them they will drop out. At the moment, for a great number of retailers, the think hinges on the way it is to be tariffed. (0 Refs)

Says that according to analysts, information technology managers can provide robust security by making sure wireless users are authenticated, preferably with a user name and password as well as a token. Says also that encryption should be used end-to-end in a connection. States that security can even be made strong enough to allow **purchases** or **money transfers** over the **Web** . Says Mark Ebel, director of digital communication services at BestBuy.com, a division of Best Buy Co. in Eden Prairie, Minnesota, ``We feel very comfortable with our wireless security, and we feel our equipment is secure. However, we do believe we have to get better at security that today's approach, because if we don't do something, we know the hackers will find ways to get better.'' Remarks that BestBuy.com is about to launch wireless purchasing on its Web site. Includes two photos. (mas)

More individuals opt for phone, net banking
JAPAN: GROWING TREND IN NET, PHONE BANKING
Nikkei Net Interactive (ATM) 10 May 2000 NihonKeizai Shimbun, online
Language: ENGLISH

Internet-based banking as well as phone banking are getting more and more popular among Japanese. The trend which is linked to convenience offered through the advance banking methods is also instilled by higher interest and discount rates on deposits given through the two banking operations. List below shows indications of the growing trend in net banking and phone banking in Japan:- - More bank customers are using telephone to . open new accounts. For instance, out of the . total account openings for Sumitomo Bank's . Super Time Deposit, over 20% were transacted . through telephone as customers were entitled . for a higher interest rate by 0.05 point. - Monthly growth of around 10% in automated . teller machine-operated money transfers. Money . transfers via the Internet and telephone is . expected to grow gradually though the current . monthly transfers only accounted for slightly . over 1%. - Money trnasfer orders through the i-mode . mobile phone service leaped to 100,000 (up . 800% in February 2000) - **Internet**-based and telephone **money transfer . orders** received by nine city banks in Japan in . January and February 2000 jumped . significantly to 210,000 and 240,000, . respectively.

BELGIUM: WESTERN UNION TO SET UP CALL CENTRE

L'Echo (EB) 08 Jul 1997 p.1

Language: FRENCH

The latest international investor to take advantage of the Brussels government's Dynamo programme to attract foreign telecoms companies to the Belgian capital is US **money transfer** and **electronic payment** company **Western Union**. The company has decided to set up its first international call centre, which will cover Europe, the Middle East and Africa, in Brussels. The company was attracted by the tax incentives available for international service centres in Brussels as well as the number of multilingual native speakers, which are vital for a call centre, that live in the city. Western Union expects to employ about 200 people in the call centre.

Paranoia 'holds up on-line banking'
SINGAPORE: BANKS TO GO ON-LINE ON THE INTERNET?
The Straits Times (XBB) 21 November 1995 P. 36
Language: ENGLISH

At a conference held on 20 November 1995 on "Marketing, Banking and Financial Services on the worldwide Web: Towards Secure Transactions", Mr Gary Leonard Koh, Chief Operating Officer of Sembawang Media (Information Technology firm), said that an innovative bank is required to move on-line on the Internet. According to him, local banks are reluctant to offer financial transactions and services (such as Giro **payments**, **money transfers**) on the **Internet**. Their concerns stamped from fear of losing their entire database of credit card numbers to a hacker on the Internet. Another problem is the difficulty of verification. This arise in the event of valid transactions and customers authentic. Currently, some major banks are working with Sembawang Media to develop this on-line service which is gaining popularity in some countries. Overseas Union Bank and the OCBC Bank are evaluating such possibility. So far, US-based Security First Network Bank, is the first bank to go in cyberspace in October 1995. US-based Barclays Bank is also offering such services.
